PROFILE

I build things that scale. From designing sleek front-end interfaces to architecting complex back-end systems, focus on delivering high-quality code that creates value. Experienced in React, Express CodeIgniter, Electron, MySQL, SQL Server and AWS Cloud.

PORTFOLIO

https://hasinthanayanajith.github.io

PROJECTS

• Electronic Document Management System – EDMS

National Water Supply and Drainage Board (NWSDB) | Funded by JICA

Contributed as a Primary Developer to design and develop this comprehensive digital system to replace manual paper-based workflows for a national utility provider, ensuring secure storage and retrieval of critical infrastructure documents.

https://www.waterboard.lk/electronic-document-management-system-edms-project-at-nwsdb/

• Vehicle Auction & Export Management System

Lion Royal Car - Japan

A specialized ERP and auction management platform hosted on **AWS** (Purchasing, Transporting, Selling, Shipping & Tracking) to streamline the procurement and global export of used vehicles from major Japanese auction houses (USS, TAA, ARAI).

• School Management System

Royal International School - Kurunegala

Engineered a comprehensive School Management System (SMS) to automate student enrolment, grading, and administrative workflows for a leading international school. Orchestrated the end-to-end deployment strategy, including configuring **Apache HTTP Servers** and hosting the platform on **VPN-secured private servers** to ensure data privacy and internal-only access.

• Service Centre Management – Billing Module & Touch Panel

Jayasekara Auto Motors | Automotive Service & Parts Provider

A robust billing and invoicing engine for a high-volume automotive service centre to automate service costs, parts, inventory pricing, and tax calculations. Plus, specialized touch-screen interface for workshop technicians to manage the "Work-in-Progress" (WIP) lifecycle—allowing for real-time tracking of job start/pause/end times and automated labour cost calculation.

• Online Dental Appointing System & Backend

SAKUKI Dental Hospital – Kurunegala | https://bestdentist.lk/

Developed a user-facing web application for real-time appointment booking, allowing patients to view doctor availability and select specialized dental services. Plus, a comprehensive dashboard for hospital staff to manage daily queues, patient medical histories, and doctor schedules.

• Wholesale Stock Management System

BS Traders Pvt Ltd. - Kandy

An inventory, accounts and sales management system, developed and deployed on AWS LightSail.
